(Former Name or Former Address, if Changed Since Last Report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

- ☐ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- ☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- ☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- ☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (17 CFR 230.405) or Rule 12b-2 of the Securities Exchange Act of 1934 (17 CFR 240.12b-2).

Emerging Growth Company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Item 2.02 Results of Operations and Financial Condition.

On January 25, 2018, Intel Corporation ("Intel") issued a press release announcing the financial results of its fourth quarter and full year ended December 30, 2017 and forward-looking statements relating to its first quarter of 2018 and full year 2018. A copy of this press release is attached hereto as Exhibit 99.1 and is incorporated by reference herein.

The attached press release includes non-GAAP financial measures relating to our operations and forecasted outlook. Certain of these non-GAAP terms will be used in Intel's earnings conference for the fourth quarter of 2017. In addition, the attached press release includes reconciliations of these GAAP to non-GAAP measures, as well as an explanation of how management uses these non-GAAP measures and the reasons why management views these measures as providing useful information for investors. These non-GAAP financial measures should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations from Intel's results should be carefully evaluated.

The information in Item 2.02 of this Report and the press release attached hereto as Exhibit 99.1 are furnished and shall not be treated as filed for purposes of the Securities Exchange Act of 1934, as amended.

Item 7.01 Regulation FD Disclosure.

On January 25, 2018, Intel also announced in the press release that its Board of Directors had approved an increase in the quarterly cash dividend. The increase was effective beginning with the dividend that was declared concurrent with the announcement.

Item 9.01 Financial Statements and Exhibits.**(d) Exhibits.**

The following exhibit is furnished as part of this Report:

<u>Exhibit Number</u>	<u>Description</u>
99.1	<u>Press Release issued by Intel entitled "Intel Reports Fourth-Quarter and Full-Year 2017 Financial Results" dated January 25, 2018.</u>

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

News Release

Intel Reports Fourth-Quarter and Full-Year 2017 Financial Results *Announces 10 Percent Increase to Quarterly Cash Dividend*

News Summary:

- Record fourth-quarter revenue was \$17.1 billion and record full-year revenue was \$62.8 billion. Excluding McAfee, fourth-quarter revenue grew 8 percent year-over-year with data-centric revenue up 21 percent, and full-year revenue grew 9 percent year-over-year.
- Delivered outstanding quarterly and annual earnings growth.
- In 2017, Intel generated a record \$22 billion cash from operations and returned nearly \$9 billion to shareholders.
- In 2018, Intel expects another record year and is raising its quarterly cash dividend 10 percent on an annual basis.

SANTA CLARA, Calif., January 25, 2018 -- Intel Corporation today reported full-year and fourth-quarter 2017 financial results. The company also announced that its board of directors has approved an increase in its cash dividend to \$1.20 per-share on an annual basis, a 10 percent increase. The board also declared a quarterly dividend of \$0.30 per-share on the company's common stock, which will be payable on March 1 to shareholders of record on February 7.

"2017 was a record year for Intel with record fourth-quarter results driven by strong growth of our data-centric businesses," said Brian Krzanich, Intel CEO. "The strategic investments we've made in areas like memory, programmable solutions, communications and autonomous driving are starting to pay off and expand Intel's growth opportunity. In 2018, our highest priorities will be executing to our data-centric strategy and meeting the commitments we make to our shareholders and our customers."

"The fourth quarter was an outstanding finish to another record year. Compared to the expectations we set, our revenue was stronger, our operating margins were higher, and our spending was lower," said Bob Swan, Intel CFO. "Intel's PC-centric business continued to execute well in a declining market while the growth of our data-centric businesses shows Intel's transformation is on track."

Intel's fourth-quarter results reflect an income tax expense of \$5.4 billion as a result of the U.S. corporate tax reform enacted in December. This includes a one-time, required transition tax on our previously untaxed foreign earnings, which was partially offset by the re-measurement of deferred taxes using the new U.S. statutory tax rate. Looking ahead, the company is forecasting a 2018 tax rate of 14 percent as the Tax Cuts and Jobs Act helps level the playing field for U.S. manufacturers like Intel that compete in today's global economy.

"Intel has a rich history of investing in U.S.-led research and development and U.S. manufacturing," said Swan. "The tax reform is further incentive to continue these investments and reinforces our decision to invest in the build-out of our Arizona factory. It also informed the dividend increase we're announcing today."

* Data-centric businesses include DCG, IOTG, NSG, PSG, and All Other.

^ No adjustment on a non-GAAP basis.

Q4 2017 Financial Highlights

	GAAP			Non-GAAP		
	Q4 2017	Q4 2016	vs. Q4 2016	Q4 2017	Q4 2016	vs. Q4 2016

For the full year, the company generated a record \$22.1 billion cash from operations, and paid dividends of \$5.1 billion.

* Data-centric businesses include DCG, IOTG, NSG, PSG, and All Other.

^ No adjustment on a non-GAAP basis.

Business Unit Summary

Key Business Unit Revenue and Trends					
		Q4 2017	vs. Q4 2016	2017	vs. 2016
PC-centric	CCG	\$9.0 billion	down 2%	\$34.0 billion	up 3%
	DCG	\$5.6 billion	up 20%	\$19.1 billion	up 11%
	IOTG	\$879 million	up 21%	\$3.2 billion	up 20%
Data-centric	NSG	\$889 million	up 9%	\$3.5 billion	up 37%
	PSG	\$568 million	up 35%	\$1.9 billion	up 14%
			up 21%*		up 16%*

In the fourth quarter, Intel saw strong performance from data-centric businesses, which accounted for 47% of Intel's fourth-quarter revenue, an all-time high. The Data Center Group (DCG), Internet of Things Group (IOTG) and Programmable Solutions Group (PSG) all achieved record quarterly revenue. Intel's Client Computing Group (CCG) shipped a record volume of Intel® Core™ i7 processors, launched the new 8th Gen Intel® Core™ processor with Radeon™ RX Vega M Graphics, and announced an expanding line-up of LTE and 5G multi-mode modems. The Non-Volatile Memory Solutions Group (NSG) launched the new Intel® Optane™ SSD DC P4800X Series for the data center.

The company is also advancing efforts to compete and win in artificial intelligence with the Intel® Nervana™ Neural Network Processor, customer momentum for its Intel® Movidius™ vision processing unit (VPU), and continued customer adoption of Intel® Xeon® Scalable processors. In autonomous driving, Mobileye had a strong finish to 2017 with a total of 30 ADAS customer designs wins as well as design wins for advanced L2+ and L3 autonomous systems with 11 automakers.

Additional information regarding Intel's results can be found in the Q4'17 Earnings Presentation available at: www.intc.com/results.cfm.

* Data-centric growth excludes McAfee.

Business Outlook

Intel's guidance for the first-quarter and full-year 2018 include both GAAP and non-GAAP estimates. Reconciliations between these GAAP and non-GAAP financial measures are included below.

Q1 2018	GAAP	Non-GAAP	Range
Revenue	\$15.0 billion	\$15.0 billion^	+/- \$500 million
Operating margin	25%	27%	approximately
Tax rate	14%	14%^	approximately
Earnings per share	\$0.65	\$0.70	+/- 5 cents
Full-Year 2018	GAAP	Non-GAAP	Range
Revenue	\$65.0 billion	\$65.0 billion^	+/- \$1.0 billion
Operating margin	28%	30%	approximately
Tax rate	14%	14%^	approximately
Earnings per share	\$3.30	\$3.55	+/- 5%
Full-year capital spending	\$14.0 billion	\$14.0 billion^	+/- \$500 million
Net capital deployed ¹	\$12.0 billion	\$12.0 billion^	+/- \$500 million
Free cash flow	N/A	\$13.0 billion	+/- \$500 million

¹Net capital deployed is full-year capital spending offset by expected prepaid supply agreements in our memory business.

Intel's Business Outlook does not include the potential impact of any business combinations, asset acquisitions, divestitures, strategic investments and other significant transactions that may be completed after January 25, 2018. Actual results may differ materially from Intel's Business Outlook as a result of, among other things, the factors described under "Forward-Looking Statements" below.

Earnings Webcast

Intel will hold a public webcast at 2:00 p.m. PDT today to discuss the results for its fourth quarter and full year of 2017. The live public webcast can be accessed on Intel's Investor Relations website at www.intc.com/results.cfm. The Q4'17 Earnings Presentation, webcast replay, and audio download will also be available on the site.

Intel plans to report its earnings for the first quarter of 2018 on April 26, 2018 promptly after close of market, and related materials will be available at www.intc.com/results.cfm. A public webcast of Intel's earnings conference call will follow at 2:00 p.m. PDT at www.intc.com.

Forward-Looking Statements

Intel's Business Outlook and other statements in this release that refer to future plans and expectations are forward-looking statements that involve a number of risks and uncertainties. Words such as "anticipates," "expects," "intends," "goals," "plans," "believes," "seeks," "estimates," "continues," "may," "will," "would," "should," "could," and variations of such words and similar expressions are intended to identify such forward-looking statements. Statements that refer to or are based on projections, uncertain events or assumptions also identify forward-looking statements. All forward-looking statements included in this news release are based on management's expectations as of the date of this earnings release and, except as required by law, Intel disclaims any obligation to update these forward-looking statements to reflect future events or circumstances. Forward-looking statements involve many risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such statements. Intel presently considers the following to be important factors that could cause actual results to differ materially from the company's expectations.

^ No adjustment on a non-GAAP basis.

- Demand for Intel's products is highly variable and could differ from expectations due to factors including changes in business and economic conditions; customer confidence or income levels; the introduction, availability and market acceptance of Intel's products, products used together with Intel products and competitors' products; competitive and pricing pressures, including actions taken by competitors; supply constraints and other disruptions affecting customers; changes in customer order patterns including order cancellations; and changes in the level of inventory at customers.
 - Intel's gross margin percentage could vary significantly from expectations based on capacity utilization; variations in inventory valuation, including variations related to the timing of qualifying products for sale; changes in revenue levels; segment product mix; the timing and execution of the manufacturing ramp and associated costs; excess or obsolete inventory; changes in unit costs; defects or disruptions in the supply of materials or resources; and product manufacturing quality/yields. Variations in gross margin may also be caused by the timing of Intel product introductions and related expenses, including marketing programs, and Intel's ability to respond quickly to technological developments and to introduce new products or incorporate new features into existing products, which may result in restructuring and asset impairment charges.
 - Intel's results could be affected by adverse economic, social, political and physical/infrastructure conditions in countries where Intel, its customers or its suppliers operate, including military conflict and other security risks, natural disasters, infrastructure disruptions, health concerns, fluctuations in currency exchange rates, sanctions and tariffs, and continuing uncertainty regarding social, political, immigration, and tax and trade policies in the U.S. and abroad, including the United Kingdom's vote to withdraw from the European Union. Results may also be affected by the formal or informal imposition by countries of new or revised export and/or import and doing-business regulations, which could be changed without prior notice.
 - Intel operates in highly competitive industries and its operations have high costs that are either fixed or difficult to reduce in the short term.
 - The amount, timing and execution of Intel's stock repurchase program may fluctuate based on Intel's priorities for the use of cash for other purposes—such as investing in our business, including operational and capital spending, acquisitions, and returning cash to our stockholders as dividend payments—and because of changes in cash flows or changes in tax laws.
 - Intel's expected tax rate is based on current tax law, including current interpretations of the Tax Cuts and Jobs Act of 2017 ("TCJA"), and current expected income and may be affected by evolving interpretations of TCJA; the jurisdictions in which profits are determined to be earned and taxed; changes in the estimates of credits, benefits and deductions; the resolution of issues arising from tax audits with various tax authorities, including payment of interest and penalties; and the ability to realize deferred tax assets.
 - Gains or losses from equity securities and interest and other could vary from expectations depending on gains or losses on the sale, exchange, change in the fair value or impairments of debt and equity investments, interest rates, cash balances, and changes in fair value of derivative instruments.
 - Product defects or errata (deviations from published specifications) may adversely impact our expenses, revenues and reputation.
-

- Security vulnerability issues may exist with respect to our processors and other products as well as the operating systems and workloads running on them. Mitigation techniques, including software and firmware updates, may not operate as intended or effectively resolve these vulnerabilities. In addition, we may be required to rely on third parties, including hardware, software, and services vendors, as well as end users, to develop and deploy mitigation techniques, and the effectiveness of mitigation techniques may depend solely or in part on the actions of these third parties. Security vulnerabilities and/or mitigation techniques, including software and firmware updates, may result in adverse performance, reboots, system instability, data loss or corruption, unpredictable system behavior, or the misappropriation of data by third parties. We have and may continue to face product claims, litigation, and adverse publicity and customer relations from security vulnerabilities and/or mitigation techniques, including as a result of side-channel exploits such as "Spectre" and "Meltdown," which could adversely impact our results of operations, customer relationships, and reputation. Separately, the publicity around recently disclosed security vulnerabilities may result in increased attempts by third parties to identify additional vulnerabilities, and future vulnerabilities and mitigation of those vulnerabilities may also adversely impact our results of operations, customer relationships, and reputation.
- Intel's results could be affected by litigation or regulatory matters involving intellectual property, stockholder, consumer, antitrust, disclosure and other issues. An unfavorable ruling could include monetary damages or an injunction prohibiting Intel from manufacturing or selling one or more products, precluding particular business practices, impacting Intel's ability to design its products, or requiring other remedies such as compulsory licensing of intellectual property.
- Intel's results may be affected by the timing of closing of acquisitions, divestitures and other significant transactions.

Additional information regarding these and other factors that could affect Intel's results is included in Intel's SEC filings, including the company's most recent reports on Forms 10-K and 10-Q, copies of which may be obtained by visiting our Investor Relations website at www.intc.com or the SEC's website at www.sec.gov.

In the third quarter of 2017, Intel completed its tender offer for the outstanding ordinary shares of Mobileye B.V. (Mobileye), formerly known as Mobileye N.V. In the second quarter of 2017, Intel completed the planned divestiture of Intel Security Group (ISecG). The results of Mobileye and ISecG are reported within the "All Other" category.

Revenue for our reportable and non-reportable operating segments is primarily related to the following product lines:

- *Client Computing Group.* Includes platforms designed for notebooks and desktops (including 2-in-1, thin-and-light, high-end desktop, and all-in-one), wireless and wired connectivity products.
- *Data Center Group.* Includes workload-optimized platforms and related products designed for enterprise, cloud, and communication infrastructure market segments.
- *Internet of Things Group.* Includes high performance IoT platforms for retail, automotive, industrial, and other broad range of embedded applications.
- *Non-Volatile Memory Solutions Group.* Includes Intel® Optane™ technology and 3D NAND flash memory, primarily used in solid state drives (SSDs).
- *Programmable Solutions Group.* Includes programmable semiconductors, primarily field-programmable gate arrays (FPGAs), and related products for a broad range of markets, such as communications, data center, industrial, military, and automotive.

We have sales and marketing, manufacturing, engineering, finance, and administration groups. Expenses for these groups are generally allocated to the operating segments and the expenses are included in the following operating results.

All other category includes revenue, expenses, and charges such as:

- results of operations from non-reportable segments not otherwise presented;
- historical results of operations from divested businesses;
- results of operations of start-up businesses that support our initiatives, including our foundry business;
- historical results of operations of divested businesses;
- a portion of employee benefits, compensation, and other expenses not allocated to the operating segments; and
- acquisition-related costs, including amortization and any impairment of acquisition-related intangibles and goodwill.

A substantial majority of our revenue is generated from the sale of platform products. Platform products incorporate various components and technologies, including a microprocessor and chipset, a stand-alone SoC, or a multi-chip package. Our remaining primary product lines are incorporated in "adjacency."

EXPLANATION OF NON-GAAP MEASURES

In addition to disclosing financial results in accordance with U.S. generally accepted accounting principles (GAAP), this earnings release contains references to the non-GAAP financial measures described below. We believe these non-GAAP financial measures provide investors with useful supplemental information about the financial performance of our business, enable comparison of financial results between periods where certain items may vary independent of business performance, and allow for greater transparency with respect to key metrics used by management in operating our business and measuring our performance.

Our non-GAAP financial measures reflect adjustments based on the following items, as well as the related income tax effects. Income tax effects have been calculated using an appropriate tax rate for each adjustment. These non-GAAP financial measures should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations from these results should be carefully evaluated.

Acquisition-related adjustments: The non-GAAP financial measures disclosed by the company exclude certain business combination accounting adjustments and certain expenses related to acquisitions as follows:

- **Revenue and gross margin:** Non-GAAP financial measures exclude the impact of the deferred revenue write-down, amortization of acquisition-related intangible assets that impact cost of sales, and the inventory valuation adjustment.
 - **Deferred revenue write-down:** Sales to distributors are made under agreements allowing for subsequent price adjustments and returns and are deferred until the products are resold by the distributor. Business combination accounting principles require us to write down to fair value the deferred revenue assumed in our acquisitions as we have limited performance obligations associated with this deferred revenue. Our GAAP revenues and related cost of sales for the subsequent reselling by distributors to end customers after an acquisition do not reflect the full amounts that would have been reported if the acquired deferred revenue was not written down to fair value. The non-GAAP adjustments made in the first quarter of 2016 eliminate the effect of the deferred revenue write-down associated with our acquisition of Altera. We believe these adjustments are useful to investors as an additional means to reflect revenue and gross margin trends of our business.
 - **Inventory valuation adjustment:** Business combination accounting principles require us to measure acquired inventory at fair value. The fair value of inventory reflects the acquired company's cost of manufacturing plus a portion of the expected profit margin. The non-GAAP adjustments to our cost of sales exclude the expected profit margin component that is recorded under business combination accounting principles associated with our acquisitions of Mobileye and Altera. We believe the adjustments are useful to investors as an additional means to reflect cost of sales and gross margin trends of our business.
- **Amortization of acquisition-related intangible assets:** Amortization of acquisition-related intangible assets consists of amortization of intangibles assets such as developed technology, brands, and customer relationships acquired in connection with business combinations. We record charges relating to the amortization of these intangibles within both cost of sales and operating expenses in our GAAP financial statements. Amortization charges for our acquisition-related intangible assets are inconsistent in size and are significantly impacted by the timing and valuation of our acquisitions. Consequently, our non-GAAP adjustments exclude these charges to facilitate an evaluation of our current operating performance and comparisons to our past operating performance.
- **R&D plus MG&A spending:** Non-GAAP R&D plus MG&A spending excludes the impact of other charges associated with the acquisitions of Mobileye and Altera. These charges primarily include banker's fees, compensation-related costs, and valuation charges for stock-based compensation incurred related to the acquisitions. We believe these adjustments are useful to investors as an additional means to reflect the spending trends of our business.

Restructuring and other charges: Restructuring charges are costs associated with a formal restructuring plan and are primarily related to employee severance and benefit arrangements. Other charges include asset impairments, pension charges, and costs associated with the Intel Security Group divestiture. We exclude restructuring and other charges, including any adjustments to charges recorded in prior periods, for purposes of calculating certain non-GAAP measures. We believe that these costs do not reflect our current operating performance. Consequently, our non-GAAP adjustments exclude these charges to facilitate an evaluation of our current operating performance and comparisons to our past operating performance.

Gains or losses from divestiture: We recognized a gain in the second quarter of 2017 as a result of our divestiture of the Intel Security Group. We have excluded this gain for purposes of calculating certain non-GAAP measures. We believe making these adjustments facilitates a better evaluation of our current operating performance and comparisons to past operating results.

Income tax reform: We recognized a higher income tax expense in the fourth quarter of 2017 as a result of the U.S. tax reform. We have excluded the one-time tax adjustment relating to the transition tax on our previously untaxed foreign earnings and the re-measurement of our deferred income taxes to the new U.S. statutory tax rate for purposes of calculating certain non-GAAP measures. We believe making these adjustments facilitates a better evaluation of our current operating performance and comparisons to past operating results.

Gross cash and other longer term investments: We reference non-GAAP financial measures of gross cash and other longer term investments, which are used by management when assessing our sources of liquidity and capital resources. We believe these non-GAAP financial measures are helpful to investors in understanding our capital structure and how we manage our resources.

Free cash flow: We reference a non-GAAP financial measure of free cash flow, which is used by management when assessing our sources of liquidity, capital resources, and operating performance. We believe this non-GAAP financial measure is helpful to investors in understanding our capital structure and provides an additional means to reflect the cash flow trends of our business.
