Item 2.02 Results of Operations and Financial Condition.

On October 25, 2018, Intel Corporation ("Intel") issued a press release announcing the financial results of its third quarter ended September 29, 2018 and forward-looking statements relating to its fourth quarter of 2018 and full year 2018. A copy of this press release is attached hereto as Exhibit 99.1 and is incorporated by reference herein.

The attached press release includes non-GAAP financial measures relating to our operations and forecasted outlook. Certain of these non-GAAP terms will be used in Intel's earnings conference for the third quarter of 2018. In addition, the attached press release includes reconciliations of these non-GAAP measures to GAAP measures, as well as an explanation of how management uses these non-GAAP measures and the reasons why management views these measures as providing useful information for investors. These non-GAAP financial measures should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations to these results should be carefully evaluated.

The information in Item 2.02 of this Report and the press release attached hereto as Exhibit 99.1 are furnished and shall not be treated as filed for purposes of the Securities Exchange Act of 1934, as amended.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

The following exhibit is furnished as part of this Report:

Exhibit Number Description

99.1 <u>Press Release issued by Intel entitled "Intel Reports Third-Quarter Financial</u>

Results" dated October 25, 2018.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Intel Reports Third-Quarter Financial Results

News Summary:

- Record quarterly revenue of \$19.2 billion, up 19 percent year-over-year (YoY); data-centric* revenue grew 22 percent and PC-centric revenue grew 16 percent.
- · Record quarterly GAAP earnings-per-share (EPS) of \$1.38 grew 47 percent YoY; non-GAAP EPS of \$1.40 was up 39 percent.
- Year-to-date, generated \$22.5 billion in cash from operations, \$11.2 billion of free cash flow and returned \$12.6 billion to shareholders, including dividends
 of \$4.17 billion and share repurchases of \$8.46 billion.
- Raising full-year revenue outlook to \$71.2 billion, GAAP EPS outlook to approximately \$4.52 and non-GAAP EPS of \$4.53; up \$1.7 billion, \$0.42 and \$0.38 from July guidance, respectively.

SANTA CLARA, Calif., October 25, 2018 -- Intel Corporation today reported third-quarter 2018 financial results. Third-quarter revenue of \$19.2 billion was an all-time record, up 19 percent YoY driven by broad business strength and customer preference for performance-leading products. The Client Computing Group (CCG), the Data Center Group (DCG), the Internet of Things Group (IOTG), the Non-volatile Memory Solutions Group (NSG) and Mobileye all achieved record revenue. Collectively, data-centric businesses grew 22 percent, led by 26 percent YoY growth in DCG. PC-centric revenue was up 16 percent on continued strength in the commercial and gaming segments. Excellent operating margin leverage and a lower tax rate drove record quarterly EPS.

"Stronger than expected customer demand across our PC and data-centric businesses continued in the third quarter. This drove record revenue and another raise to our full-year outlook, which is now up more than six billion dollars from our January expectations. We are thrilled that in a highly competitive market, customers continue to choose Intel," said Bob Swan, Intel CFO and Interim CEO. "In the fourth quarter, we remain focused on the challenge of supplying the incredible market demand for Intel products to support our customers' growth. We expect 2018 will be another record year for Intel, and our transformation positions us to win share in an expanded \$300 billion¹ total addressable market."

Q3 2018 Financial Highlights

		GAAP			Non-GAAP	
	Q3 2018	Q3 2017	vs. Q3 2017	Q3 2018	Q3 2017	vs. Q3 2017

Business Unit Summary

Kev Business	Unit Revenue	and Trends

		Q3 2018	vs. Q3 2017
PC-centric	CCG	\$10.2 billion	up 16%
	DCG	\$6.1 billion	up 26%
	IOTG	\$919 million	up 8%
Data-centric	NSG	\$1.1 billion	up 21%
	PSG	\$496 million	up 6%
			up 22%*

In the third quarter, Intel achieved growth in every business segment. The PC-centric business (CCG) delivered record revenue, up 16 percent on continued strong demand for Intel's performance-leading products and strength in commercial and gaming. CCG launched new U and Y-series 8th Gen Intel® Core™ processors enabling faster connectivity speeds, better performance and longer battery life for thin, light laptops and 2 in 1 devices. We also recently introduced the Intel Core i9-9900K processor, the world's best gaming processor1.

Collectively, Intel's data-centric businesses grew 22 percent YoY led by 26 percent growth in the Data Center Group (DCG). DCG achieved record quarterly revenue driven by strong demand from cloud and communications service providers investing to meet the explosive demand for data and to improve the performance of data-intensive workloads like artificial intelligence. In Q3, DCG shipped the first Intel® Optane™ DC Persistent Memory for revenue, and Intel® Xeon® Scalable set 95 new performance world records² as adoption continued.

The Internet of Things Group (IOTG) also achieved record revenue. Excluding Wind River, which Intel divested in the second quarter, IOTG revenue was up 19 percent YoY on broad business strength. Record revenue in Intel's memory business (NSG) was up 21 percent YoY.

Intel's Programmable Solutions Group (PSG) revenue grew 6 percent YoY with continued strength in the data center and strong organic growth. PSG expanded its product line with the acquisition of eASIC and the introduction of the new Intel® Programmable Acceleration Card (PAC) with Intel® Stratix® 10 SX FPGA.

Mobileye also achieved record quarterly revenue of \$191 million, up approximately 50 percent YoY3 as customer momentum continued. Mobileye won 8 new design at major US and global automakers in Q3, bringing its year-to-date design win total to 20.

Additional information regarding Intel's results can be found in the Q3'18 Earnings Presentation available at: www.intc.com/results.cfm.

Business Outlook

Intel's guidance for the fourth-quarter and full-year 2018 include both GAAP and non-GAAP estimates. Reconciliations between these GAAP and non-GAAP financial measures are included below.

Intel's Business Outlook does not include the potential impact of any business combinations, asset acquisitions, divestitures, strategic investments and other significant transactions that may be completed after October 25, 2018. Actual results may differ materially from Intel's Business Outlook as a result of, among other things, the factors described under "Forward-Looking Statements" below.

Q4 2018	GAAP	Non-GAAP
	Approximately	Approximately
Revenue	\$19.0 billion	\$19.0 billion^
Operating Margin	33%	34.5%
Tax rate	13%	13%
Earnings per share	\$1.16	\$1.22
Full-Year 2018	GAAP	Non-GAAP
	Approximately	Approximately
Revenue	\$71.2 billion	\$71.2 billion^
Operating margin	33%	34.5%
Tax rate	11%	12%
Earnings per share	\$4.52	\$4.53
Full-year capital spending	\$15.5 billion	\$15.5 billion^
Net capital deployed ¹	\$14.0 billion	\$14.0 billion^
Free cash flow	N/A	\$15.5 billion^
Net capital deployed is full-year capital spending offset by expected prepaid supply agreements within NSG.		

Earnings Webcast

Intel will hold a public webcast at 2:00 p.m. PDT today to discuss the results for its third quarter of 2018. The live public webcast can be accessed on Intel's Investor Relations website at www.intc.com/results.cfm. The Q3'18 Earnings Presentation, webcast replay, and audio download will also be available on the site.

Intel plans to report its earnings for the fourth quarter of 2018 on January 24, 2019 promptly after close of market, and related materials will be available at www.intc.com/results.cfm. A public webcast of Intel's earnings conference call will follow at 2:00 p.m. PDT at www.intc.com.

[^] No adjustment on a non-GAAP basis.

Forward-Looking Statements

Intel's Business Outlook and other statements in this release that refer to future plans and expectations are forward-looking statements that involve a number of risks and uncertainties. Words such as "anticipates," "expects," "intends," "goals," "plans," "believes," "seeks," "estimates," "continues," "may," "will," "would," "should," "could," and variations of such words and similar expressions are intended to identify such forward-looking statements. Statements that refer to or are based on estimates, forecasts, projections, uncertain events or assumptions, including statements relating to total addressable market (TAM) or market opportunity and anticipated trends in our businesses or the markets relevant to them, also identify forward-looking statements. All forward-looking statements included in this news release are based on management's expectations as of the date of this earnings release and, except as required by law, Intel disclaims any obligation to update these forward-looking statements to reflect future events or circumstances. Forward-looking statements involve many risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such statements. Intel presently considers the following to be among the important factors that could cause actual results to differ materially from the company's expectations.

- Demand for Intel's products is highly variable and could differ from expectations due to factors including changes in business and economic conditions; customer confidence or income levels; the introduction, availability and market acceptance of Intel's products, products used together with Intel products and competitors' products; competitive and pricing pressures, including actions taken by competitors; supply constraints and other disruptions affecting customers; changes in customer order patterns including order cancellations; and changes in the level of inventory at customers.
- Intel's results could vary significantly from expectations based on capacity utilization; variations in inventory valuation, including variations related to the
 timing of qualifying products for sale; changes in revenue levels; segment product mix; the timing and execution of the manufacturing ramp and
 associated costs; excess or obsolete inventory; changes in unit costs; defects or disruptions in the supply of materials or resources; and product
 manufacturing quality/yields. Variations in results may also be caused by the timing of Intel product introductions and related expenses, including
 marketing programs, and Intel's ability to respond quickly to technological developments and to introduce new products or incorporate new features into
 existing products, which may result in restructuring and asset impairment charges.
- Intel's results could be affected by adverse economic, social, political and physical/infrastructure conditions in countries where Intel, its customers or its suppliers operate, including military conflict and other security risks, natural disasters, infrastructure disruptions, health concerns, fluctuations in currency exchange rates, sanctions and tariffs, and continuing uncertainty regarding social, political, immigration, and tax and trade policies in the U.S. and abroad, including the United Kingdom's vote to withdraw from the European Union. Results may also be affected by the formal or informal imposition by countries of new or revised export and/or import and doing-business regulations, which could be changed without prior notice.
- Intel operates in highly competitive industries and its operations have high costs that are either fixed or difficult to reduce in the short term. In addition, in connection with our strategic transformation to a data-centric company, we have entered new areas and introduced adjacent products, where we face new sources of competition and uncertain market demand or acceptance of our products, and these new areas and products may not grow as projected.
- The amount, timing and execution of Intel's stock repurchase program may fluctuate based on Intel's priorities for the use of cash for other purposes—such as investing in our business, including operational and capital spending, acquisitions, and returning cash to our stockholders as dividend payments—and because of changes in cash flows, tax laws, or the market price of our common stock.
- Intel's expected tax rate is based on current tax law, including current interpretations of the Tax Cuts and Jobs Act of 2017 ("TCJA"), and current expected income and may be affected by evolving interpretations of TCJA; the jurisdictions in which profits are determined to be earned and taxed; changes in the estimates of credits, benefits and deductions; the resolution of issues arising from tax audits with various tax authorities, including payment of interest and penalties; and the ability to realize deferred tax assets.
- Intel's results could be affected by gains or losses from equity securities and interest and other, which could vary depending on gains or losses on the
 change in fair value, sale, exchange, or impairments of equity and debt investments, interest rates, cash balances, and changes in fair value of
 derivative instruments.

Intel/Page 5

- Product defects or errata (deviations from published specifications) may adversely impact our expenses, revenues and reputation.
- We or third parties regularly identify security vulnerabilities with respect to our processors and other products as well as the operating systems and workloads running on them. Security vulnerabilities and any limitations of, or adverse effects resulting from, mitigation techniques can adversely affect our results of operations, financial condition, customer relationships, prospects, and reputation in a number of ways, any of which may be material, including incurring significant costs related to developing and deploying updates and mitigations, writing down inventory value, a reduction in the competitiveness of our products, defending against product claims and litigation, responding to regulatory inquiries or actions, paying damages, addressing customer satisfaction considerations, or taking other remedial steps with respect to third parties. Adverse publicity about security vulnerabilities or mitigations could damage our reputation with customers or users and reduce demand for our products and services. A detailed description of these risks is set forth in the risk factor titled "Third parties regularly attempt to gain unauthorized access to our network, products, services, and infrastructure" in our most recent report on Form 10-K, as updated in our reports on Form 10-Q.
- Intel's results could be affected by litigation or regulatory matters involving intellectual property, stockholder, consumer, antitrust, disclosure and other issues. An unfavorable ruling could include monetary damages or an injunction prohibiting Intel from manufacturing or selling one or more products, precluding particular business practices, impacting Intel's ability to design its products, or requiring other remedies such as compulsory licensing of intellectual property.
- · Intel's results may be affected by the timing of closing of acquisitions, divestitures and other significant transactions.

Detailed information regarding these and other factors that could affect Intel's business and results is included in Intel's SEC filings, including the company's most recent reports on Forms 10-K and 10-Q, particularly the "Risk Factors" sections of those reports. Copies of these filings may be obtained by visiting our Investor Relations website at www.intc.com or the SEC's website at www.sec.gov.

In the third quarter of 2017, Intel completed its tender offer for the outstanding ordinary shares of Mobileye B.V. (Mobileye), formerly known as Mobileye N.V. In the second quarter of 2017, Intel completed its divestiture of Intel Security Group (ISecG). The results of Mobileye and ISecG are reported within the "All Other" category.

Revenue for our reportable and non-reportable operating segments is primarily related to the following product lines:

- CCG is responsible for all aspects of the client computing continuum, which includes platforms designed for end-user form factors, focusing on high growth segments of 2-in-1, thin-and-light, commercial and gaming, and growing adjacencies as well as connectivity technologies.
- DCG develops workload-optimized platforms for compute, storage, network, and related functions, which are designed for and sold into the enterprise and government, cloud, and communications service providers market segments.
- IOTG develops and sells high-performance Internet of Things compute solutions for retail, automotive, industrial, and video surveillance market segments, along with a broad range of other
 embedded applications. These market-driven solutions utilize silicon and software assets from our data center and client businesses to expand our compute footprint into Internet of Things market
 segments.
- NSG offers Intel® Optane™ and Intel® 3D NAND technologies, which drive innovation in solid-state drives (SSDs) and other memory products. The primary customers are enterprise and cloud-based data centers, users of business and consumer desktops and laptops, and a variety of embedded and Internet of Things application providers.
- PSG offers programmable semiconductors, primarily field-programmable gate arrays (FPGAs) and related products for a broad range of market segments, including communications, data center, industrial, military, and automotive.

We have sales and marketing, manufacturing, engineering, finance, and administration groups. Expenses for these groups are generally allocated to the operating segments and the expenses are included in the following operating results.

All other category includes revenue, expenses, and charges such as:

- results of operations from non-reportable segments not otherwise presented, including Mobileye results;
- historical results of operations from divested businesses;
 results of operations of start-up businesses that support of
- results of operations of start-up businesses that support our initiatives, including our foundry business;
- amounts included within restructuring and other charges;
- a portion of employee benefits, compensation, and other expenses not allocated to the operating segments; and
- acquisition-related costs, including amortization and any impairment of acquisition-related intangibles and goodwill.

A substantial majority of our revenue is generated from the sale of platform products. Platform products incorporate various components and technologies, including a microprocessor and chipset, a stand-alone SoC, or a multi-chip package. Our remaining primary product lines are incorporated in "adjacency."

INTEL CORPORATION EXPLANATION OF NON-GAAP MEASURES

In addition to disclosing financial results in accordance with U.S. generally accepted accounting principles (GAAP), this earnings release contains references to the non-GAAP financial measures described below. We believe these non-GAAP financial measures provide investors with useful supplemental information about the financial performance of our business, enable comparison of financial results between periods where certain items may vary independent of business performance, and allow for greater transparency with respect to key metrics used by management in operating our business and measuring our performance.

Our non-GAAP financial measures reflect adjustments based on the following items, as well as the related income tax effects. Income tax effects have been calculated using an appropriate tax rate for each adjustment. These non-GAAP financial measures should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations from these results should be carefully evaluated.

Acquisition-related adjustments: The non-GAAP financial measures disclosed by the company exclude certain business combination accounting adjustments and certain expenses related to acquisitions.

- Inventory valuation adjustments: Business combination accounting principles require us to measure acquired inventory at fair value. The fair value of inventory reflects the acquired company's cost of manufacturing plus a portion of the expected profit margin. The non-GAAP adjustments to our cost of sales exclude the expected profit margin component that is recorded under business combination accounting principles associated with our acquisition of Mobileye. We believe the adjustments are useful to investors as an additional means to reflect cost of sales and gross margin trends of our business.
- Amortization of acquisition-related intangible assets: Amortization of acquisition-related intangible assets consists of amortization of intangible assets such as developed technology, brands, and customer relationships acquired in connection with business combinations. We record charges related to the amortization of these intangibles within both cost of sales and operating expenses in our GAAP financial statements. Amortization charges for our acquisition-related intangible assets are inconsistent in size and are significantly impacted by the timing and valuation of our acquisitions. Consequently, our non-GAAP adjustments exclude these charges to facilitate an evaluation of our current operating performance and comparisons to our past operating performance.
- Other acquisition-related charges: Other acquisition-related charges exclude the impact of other charges associated with the acquisition of Mobileye. These charges primarily include bankers' fees, compensation-related costs, and valuation charges for stock-based compensation incurred related to the acquisition. We believe these adjustments are useful to investors as an additional means to reflect the spending trends of our business.

Restructuring and other charges: Restructuring charges are costs associated with a formal restructuring plan and are primarily related to employee severance and benefit arrangements. Other charges include asset impairments, pension charges, and costs associated with the ISecG divestiture. We exclude restructuring and other charges, including any adjustments to charges recorded in prior periods, for purposes of calculating certain non-GAAP measures. We believe that these costs do not reflect our current operating performance. Consequently, our non-GAAP adjustments exclude these charges to facilitate an evaluation of our current operating performance and comparisons to our past operating performance.

Ongoing mark to market on marketable equity securities: We exclude gains and losses resulting from ongoing mark to market adjustments of our marketable equity securities when calculating certain non-GAAP measures, as we do not believe this volatility correlates to our core operational performance. Consequently, our non-GAAP earnings per share figures exclude these impacts to facilitate an evaluation of our current performance and comparisons to our past operating performance.

Gains or losses from divestitures: We divested ISecG in Q2 2017 and Wind River in Q2 2018. We exclude gains or losses, and related tax impacts, resulting from divestitures when calculating certain non-GAAP measures. We believe making these adjustments facilitates a better evaluation of our current operating performance and comparisons to our past operating performance.

Tax Reform adjustment: During 2018, we made adjustments to our U.S. Tax Cuts and Jobs Act (Tax Reform) provisional tax estimates that we recorded in Q4 2017. We exclude these provisional tax adjustments when calculating certain non-GAAP measures. We believe making this adjustment facilitates a better evaluation of our current operating performance and comparisons to past operating results.

Free cash flow: We reference a non-GAAP financial measure of free cash flow, which is used by management when assessing our sources of liquidity, capital resources, and operating performance. We believe this non-GAAP financial measure is helpful to investors in understanding our capital structure and provides an additional means to reflect the cash flow trends of our business.

INTEL CORPORATION SUPPLEMENTAL RECONCILIATIONS OF GAAP OUTLOOK TO NON-GAAP OUTLOOK

Set forth below are reconciliations of the non-GAAP financial measure to the most directly comparable GAAP financial measure. The non-GAAP financial measures disclosed by the company have limitations and should not be considered a substitute for, or superior to, the financial measures prepared in accordance with GAAP, and the financial outlook prepared in accordance with GAAP and the reconciliations from this Business Outlook should be carefully evaluated. Please refer to "Explanation of Non-GAAP Measures" in this document for a detailed explanation of the adjustments made to the comparable GAAP measures, the ways management uses the non-GAAP measures, and the reasons why management believes the non-GAAP measures provide useful information for investors.
